Data Science, Minor

Program Co-Directors: Wenhui Sheng, Ph.D and Michael Zimmer, Ph.D

Data Science is the emerging field that seeks to extract and quantify knowledge from data. The interdisciplinary Data Science minor (INDS) integrates statistics and mathematics with computer science, allowing students to develop the knowledge and skills necessary to discover and quantify new knowledge from data. Those prepared to integrate advanced technology with modern statistical and mathematical practices have the opportunity to use data in action to benefit society. Data scientists turn data into knowledge.

Interdisciplinary Minor in Data Science

The interdisciplinary data science minor consists of 19 credit hours of courses, including five required computer science and mathematics courses (16 credit hours) and an additional 3 credit hours of an advanced elective.

</table>

Advanced elective: Choose one of the following courses:

- COSC 3090 | Bioinformatics Algorithms
- COSC 4500 | Visual Analytics
- COSC 4600 | Fundamentals of Artificial Intelligence
- COSC 4800 | Principles of Database Systems
- MATH 3100 | Linear Algebra and Matrix Theory
- MATH 4700 | Theory of Probability
- MATH 4710 | Mathematical Statistics
- MATH 4760 | Time Series Analysis
- MATH 4780 | Regression Analysis

Total Credit Hours: 19

Notes:
- Other courses may be approved as an advanced elective with the consent of the departments.
- The MATH 1700 Modern Elementary Statistics and MATH 2780 Introduction to Regression and Classification sequence is recommended for students without a background in calculus. With the departments consent, MATH 1700 Modern Elementary Statistics may substituted with an equivalent statistics course.
- The MATH 4720 Statistical Methods and MATH 4780 Regression Analysis sequence is recommended for students who have successfully completed a college level calculus course and are comfortable with calculus. MATH 4740 Biostatistical Methods and Models may be substituted for MATH 4720 Statistical Methods.
