Economics, Minor

Economics is a way of thinking about the world and factors that influence and shape human actions. As a social science, economic concepts can be used to study many forms of human endeavor and seek solutions to business and societal problems to help people lead more fruitful lives. Those issues and problems intersect with many other disciplines, so a minor in Economics is an excellent way to craft a personalized curriculum that can provide insights and the tools to succeed in a variety of career pathways. In addition, students can take part in unique opportunities such as the Applied Global Business Learning program, which allows students to apply their economic skills in developing countries, and the Czech Republic program, where students learn about international business issues in the European Union.

Minor in Economics

The minor in Economics consists of 18 credit hours: two required courses (6 credit hours) and four upper division economics electives (12 credit hours). In addition to the economics course requirements, a basic statistics course (3 credit hours) is required as listed below.
