EXBU 6510 Accounting for Managerial Decisions (4 credits)

Emphasizes the role of accounting as a financial information system for managerial decisions. Since course participants will have had differing exposure to financial accounting, the basic financial accounting concepts and procedures will be covered first. Then, specific managerial accounting techniques and concepts will follow. Short cases, term projects and a computerized operational planning exercise will be used to learn the value of budgeting as a planning tool. Each of the major assignments will require written and oral reports.

Prerequisite: Admitted to Executive M.B.A. program.

Level of Study: Graduate

EXBU 6515 Business Law (2 credits)

Law establishes the parameters within which business transactions must be conducted and the mechanisms and standards by which disputes must be resolved. Just as athletes cannot hope to win unless they know the rules, business managers must have a basic understanding of fundamental business law principles if they are to know how best to structure and to carry out transactions for the benefit of the organization. Just as importantly, business managers must be sufficiently sensitive to legal matters to know when to seek professional legal assistance.

Prerequisite: Admitted to Executive M.B.A. program.

Level of Study: Graduate

Last four terms offered: 2022 Summer Term

Schedule of Classes (<https://bulletin.marquette.edu/class-search/?details&code=EXBU%206515>)

EXBU 6545 Global Macroeconomics (3 credits)

Macroeconomics is one of the two major branches of economics, the other branch being microeconomics. Macroeconomics is concerned with the behavior of key economic aggregates, total output (GDP) and its growth rate, the unemployment rate, and the inflation rate and the foreign exchange rate. There are many other economic aggregates that are related to one or more of these key macroeconomic variables including income, wealth, money, consumption, investment, wages, productivity, interest rates, trade balance and capital flows. These, too, are of concern in macroeconomics. Explores the overall global macroeconomic environment within which businesses operate. Focuses on the general state of the business cycle and the related economic issues of savings, investment, the balance of payments, and money and examines their impact on the problems of inflation and unemployment. Considers various measures used to track the business cycle and build simple models of the macro economy, interest rates and exchange rates. Uses these models to examine the role of fiscal and monetary policy in stabilizing the economy and how various global economic measures (inflation, interest rates, exchange rates) are related. Provides insight that contributes to intelligent business decision making.
