Neuroscience (NRSC)

Program Director: SuJean Choi, Ph.D.
Neuroscience Graduate Program website (http://www.marquette.edu/grad/programs-neuroscience.php)

DEGREE OFFERED
Doctor of Philosophy

Educational Goals and Student Learning Outcomes
Upon completion of the neuroscience doctorate program, a student is able to:

1. Demonstrate an in-depth mastery of advanced interdisciplinary concepts in the neurosciences.
2. Demonstrate independent scientific reasoning.
3. Design and execute original research in an area of neuroscience specialization.
4. Demonstrate effective oral communication of interdisciplinary neuroscience concepts.

PROGRAM DESCRIPTION
Neuroscience is the study of the structure and function of the brain and nervous system and is currently one of the fastest growing areas in science education and research. The graduate program in neuroscience involves, at a minimum, faculty from the Departments of Biological Sciences; Biomedical Engineering; Biomedical Sciences; Mathematics, Statistics and Computer Science; Philosophy; Physical Therapy-Exercise Science; and Psychology. It is designed to provide students with research training and didactic course work that includes a broad foundation of neuroscience that can then be complemented with specialized courses within subfields.

PREREQUISITES FOR ADMISSION
Applicants to the neuroscience program must hold a baccalaureate degree, or its academic equivalent, from a college or university of recognized standing. The undergraduate background must be appropriate to the chosen course of study. Applicants are expected to have completed a bachelor's degree, which includes course work in one or more of the following: science, technology, engineering and mathematics. Applicants must have a minimum cumulative grade point average of 3.000 (on a scale of 4.000) in their undergraduate course work.

Application Deadline
Applications are due to the Graduate School by December 1 for the following fall term.

APPLICATION REQUIREMENTS
Applicants must submit, directly to the Marquette University Graduate School:

1. A completed application form and fee online (http://marquette.edu/grad/future_apply.shtml).
2. Copies of all college/university transcripts except Marquette.¹
3. A statement of professional goals and aspirations.
4. Three letters of recommendation that give evidence of the applicant's scholarly promise.
5. GRE scores (General Test is required, Subject Test is recommended).
6. (For international applicants only) a TOEFL score or other acceptable proof of English proficiency.

The recruitment committee reviews applications and selects a sub-group for phone interviews. After phone interviews are complete, the applications are selected for on-campus interviews. All applicants are notified of the committee’s decision.

¹ Upon admission, final official transcripts from all previously attended colleges/universities, with certified English translations if original language is not English, must be submitted to the Graduate School within the first five weeks of the term of admission or a hold preventing registration for future terms will be placed on the student’s record.

Neuroscience Doctoral Requirements
Specializations: Behavioral and Cognitive Neuroscience; Cellular and Molecular Neuroscience; Computational, Neurorehabilitation and Neuroimaging Neuroscience

Neuroscience is the interdisciplinary study of the function of the nervous system, encompassing a broad spectrum of approaches from cellular and molecular function to anatomical circuitry to behavior, disorders and treatments. The neuroscience doctoral program is designed with interdisciplinary research training and curriculum, research writing and analysis skills toward preparing students for doctoral-level interdisciplinary career opportunities.
in the growing arena of neuroscience research and industry. The program involves faculty from the Departments of Biological Sciences; Biomedical Engineering; Biomedical Sciences; Physical Therapy-Exercise Science; Mathematics, Statistics and Computer Science; Philosophy; and Psychology. The program is designed to provide students with research training and didactic course work that includes a broad foundation in neuroscience that can then be complemented with specialized courses within subfields.

### Required courses:

**BISC 5140**  
Functional Neuroanatomy  
3

**NRSC/BISC 8001**  
Neuroscience Foundations 1  
4

**NRSC/BISC 8002**  
Neuroscience Foundations 2  
4

**NRSC/BISC 8003**  
Individual Development Plan  
1

**NRSC/BISC 8004**  
Science Writing and Ethics 1 (or equivalent)  
1

**NRSC/BISC 8005**  
Science Writing and Ethics 2 (or equivalent)  
1

**NRSC/BISC 8096**  
First Year Lab Rotations (taken three times at 1 cr. each)  
3

Graduate statistics course from BIOL, BISC, MSCS, PSYC or another course as approved by the director of graduate studies.  
3-4

A minimum of 12 credit hours from within the declared specialization.  
12

**NRSC 8999**  
Doctoral Dissertation  
12

**Total Credit Hours**  
44-45

1. Taking an equivalent course, such as PSYC 8125 Advanced Research Methods or MSSC 6090 Research Methods/Professional Development (repeated twice) may increase the overall credit total.

2. Depending on the specialization, 2-3 credits are taken at the 6000 or 8000 level, and a maximum of 3 credits may be taken at the 5000 level. One final course (at least 2-3 credits) may be chosen from the courses and seminars offered in any of the specializations or other doctoral level courses offered by participating departments (e.g., Biological Sciences; Biomedical Engineering; Biomedical Sciences; Physical Therapy-Exercise Science; Mathematics, Statistics and Computer Science; Philosophy; and Psychology), as appropriate to individual training plans.

### Specializations

#### BEHAVIORAL AND COGNITIVE NEUROSCIENCE

Students in this specialization acquire a foundational background in behavioral and cognitive processes and their neuroanatomical and neurophysiological foundations. Areas of focus include: perception, attention, learning, memory, executive functioning, social and affective functioning, reward, stress, mental health and disorders, development, aging and dementia.

Behavioral and cognitive neuroscience students must complete a minimum of 12 credit hours from the following list:

**Required course:**

**PSYC 8740**  
Foundations and Processes of Human Cognition  
3

or **PSYC 8780**  
Biological Bases of Behavior

Choose three of the following (may not repeat). At least two courses must be from the PHIL or PSYC courses below:  
9

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 8102</td>
<td>Advanced Statistics and Design 2 (or other approved advanced/applied statistics course)</td>
<td></td>
</tr>
<tr>
<td>PSYC 8740</td>
<td>Foundations and Processes of Human Cognition</td>
<td></td>
</tr>
<tr>
<td>PSYC 8780</td>
<td>Biological Bases of Behavior</td>
<td></td>

<td>Philosophy of Science</td>
<td></td>
</tr>
<tr>
<td>PHIL 6450</td>
<td>Philosophy of Mind</td>
<td></td>
</tr>
<tr>
<td>PHIL 6470</td>
<td>Problems in Metaphysics</td>
<td></td>
</tr>
<tr>
<td>PHIL 6959</td>
<td>Seminar in Philosophy (when topic approved by director)</td>
<td></td>
</tr>
</tbody>
</table>

Alternative course/seminar with director approval.

### Cellular and Molecular Neuroscience

Students in this specialization acquire a foundational background in core neuroscience concepts including a strong understanding of both neuronal and non-neuronal cells of the nervous system, electrical/chemical mechanisms of synaptic signaling, structure/function of the nervous system, and behavioral, physiological, and cognitive outputs of the healthy and dysfunctional nervous system. Areas of focus include: fundamental processes underlying drug and alcohol addiction, stress, depression, schizophrenia, learning and memory, obesity and eating disorders, neurodegeneration, circadian biology, ion channel function and spinal cord injury.

Cellular and molecular neuroscience students must complete a minimum of 12 credit hours from the following list:

**BIOL 8101**  
Protein Structure and Function  
2

**BIOL 8102**  
Biochemistry and Function of Nucleic Acids  
2
Computational, Neurorehabilitation and Neuroimaging Neuroscience

Students in this specialization acquire a foundational background in computational modeling, neurorehabilitation and neuroimaging. Computational modeling explores processes from single neurons to neuronal networks including neural interconnections, neural signal processing, and synaptic plasticity. Neurorehabilitation explores the mechanisms and clinical and laboratory methods for studying neural disorders and the treatment strategies to address them. Neuroimaging neuroscience explores imaging physics, mathematics, and methods toward problems in basic and applied neuroscience. Areas of focus include: statistical models for magnetic resonance imaging, computational models of gene regulatory networks, predictive models of neurophysiological processes and clinical outcomes, human visuomotor processing, functional neuroimaging, brain structural and functional connectivity, spinal cord imaging and human motor control, neural and neurodevelopmental disorders, neurodegenerative diseases, and rehabilitative strategies.

Computational, neurorehabilitation and neuroimaging neuroscience students must complete a minimum of 12 credit hours from within focus area 1, 2 or 3. See course lists for each focus, below:

**Computational**

Choose at least 12 credit hours for the Computational focus area:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

Courses

**NRSC 8001. Neuroscience Foundations 1. 4 cr. hrs.**
Comprehensive survey of nervous system function at the cellular level including biochemical synthesis and degradation, receptors and intracellular signaling pathways. Same as BISC 8001; credit is not awarded for both. Prereq: Admitted to NRSC program or cons. of instr.

**NRSC 8002. Neuroscience Foundations 2. 4 cr. hrs.**
Comprehensive survey of nervous system function at the systems and behavioral level and includes motor, sensory and regulatory systems, imaging, cognitive and computational modeling. Same as BISC 8002; credit is not awarded for both. Prereq: Admitted to NRSC program or cons. of instr.

**NRSC 8003. Individual Development Plan. 1 cr. hr.**
Guidance of students toward identifying their current interests to facilitate future career paths as well as develop a graduate career plan based on necessary skills and expertise. Same as BISC 8003; credit is not awarded for both. Prereq: Admitted to NRSC program or cons. of instr.

**NRSC 8004. Science Writing and Ethics 1. 1 cr. hr.**
An introduction of scientific writing skills necessary for a successful career in science. Same as BISC 8004; credit is not awarded for both. Prereq: BISC 8003 or NRSC 8003.

**NRSC 8005. Science Writing and Ethics 2. 1 cr. hr.**
Advanced writing skills necessary for grant writing. Same as BISC 8005; credit is not awarded for both. Prereq: BISC 8004 or NRSC 8004.

**NRSC 8096. First Year Lab Rotations. 1 cr. hr.**
Introductory lab rotations for first year graduate students based on mutual preferences of the student and faculty member. May include lab group meetings, literature search, bench work, presentation of findings and/or research plans to lab members. Same as BISC 8096; credit is not awarded for both. Prereq: Admitted to NRSC program or cons. of instr.

**NRSC 8931. Topics in Neuroscience. 1-3 cr. hrs.**
Subject matter varies as determined by needs of neuroscience graduate students. May be repeated, as subject matter changes. Same as BISC 8931; credit is not awarded for both. Prereq: Admitted to NRSC program or cons. of instr.

**NRSC 8999. Doctoral Dissertation. 1-12 cr. hrs.**
S/U grade assessment. Prereq: Cons. of dept. ch.

**NRSC 9970. Graduate Standing Continuation: Less than Half-Time. 0 cr. hrs.**
Fee. SNC/UNC grade assessment. Prereq: Cons. of prog. dir.

**NRSC 9974. Graduate Fellowship: Full-Time. 0 cr. hrs.**
Fee. SNC/UNC grade assessment. Prereq: Cons. of program dir.

**NRSC 9975. Graduate Assistant Teaching: Full-Time. 0 cr. hrs.**
Fee. SNC/UNC grade assessment. Prereq: Cons. of program dir.

**NRSC 9976. Graduate Assistant Research: Full-Time. 0 cr. hrs.**
Fee. SNC/UNC grade assessment. Prereq: Cons. of program dir.

**NRSC 9987. Doctoral Comprehensive Examination Preparation: Less than Half-Time. 0 cr. hrs.**
Fee. SNC/UNC grade assessment. Prereq: Cons. of program dir.

**NRSC 9988. Doctoral Comprehensive Examination Preparation: Half-Time. 0 cr. hrs.**
Fee. SNC/UNC grade assessment. Prereq: Cons. of program dir.

**NRSC 9989. Doctoral Comprehensive Examination Preparation: Full-Time. 0 cr. hrs.**
Fee. SNC/UNC grade assessment. Prereq: Cons. of program dir.
NRSC 9998. Doctoral Dissertation Continuation: Half-Time. 0 cr. hrs.
Fee. SNC/UNC grade assessment. Prereq: Cons. of program dir.

NRSC 9999. Doctoral Dissertation Continuation: Full-Time. 0 cr. hrs.
Fee. SNC/UNC grade assessment. Prereq: Cons. of program dir.
