Biological Sciences, MS

Chairperson: Michelle Mynlieff, Ph.D.
Department of Biological Sciences website (http://www.marquette.edu/biology/graduate-studies.shtml/)

Degree Offered
Master of Science, Plan A only

Program Description
The biological sciences graduate program aspires to train experimental scientists capable of teaching and directing independent research by providing a broad theoretical background and an appreciation for the rigor of the scientific method. This program provides excellent training in modern biology suitable for jobs in academia, industry and government, and offers students research experiences using all areas of modern biological techniques to study molecular, cellular, tissue, organ, systems and organism functioning.

Biological Sciences Master of Science

Specializations: Biochemistry, Cell Biology, Developmental Biology, Ecology, Genetics, Microbiology, Molecular Biology, Neurophysiology, Physiology

The program of course work and research for the master’s degree is determined in consultation with the student’s advisory committee. Each student is advised to take such courses as are properly related to academic background and research interests. All master’s students are required to gain the equivalent of one year of teaching experience during the program.

Master’s students must complete a total of 30 credit hours, including 21 credit hours of course work and research, three credit hours of seminar courses and six credit hours of thesis work. Required course work includes BIOL 8004 Advanced Experimental Design and BIOL 8005 Scientific Writing. Eighteen of the 30 credit hours must be taken in biological sciences. During each term in residency, master’s students are also required to enroll in BIOL 6952 Department Colloquium.

Master’s students must submit a thesis outline to their advisory committee and successfully defend the outline. This defense constitutes the qualifying exam. At the completion of the program, master’s students must submit a thesis that is approved by their advisory committee and must present a public seminar on their thesis research.

Biological Sciences Graduate Programs

• Biological Sciences, MS (p. 1)
• Biological Sciences, PHD

BIOL 5102 Experimental Molecular Biology (3 credits)
Purification, characterization and molecular analysis of proteins, nucleic acids, lipids and other biomolecules with emphasis on standard techniques widely used in research laboratories. 1 hr. lec., 4 hrs. lab.
Prerequisite: BIOL 3101 or CHEM 4530 and BIOL 4532 or equiv.
Level of Study: Graduate
Last four terms offered: 2024 Spring Term, 2019 Fall Term, 2018 Fall Term, 2017 Fall Term
Schedule of Classes

BIOL 5201 Genomics and Bioinformatics (3 credits)
The analysis of the structure, organization, function and evolution of prokaryotic and eukaryotic genomes. Students gain an understanding of how recent technological advances have revolutionized the field of genomics and of how large genomic datasets are generated, analyzed and visualized.
Level of Study: Graduate
Last four terms offered: 2023 Fall Term, 2022 Fall Term, 2021 Fall Term, 2020 Fall Term
Schedule of Classes

BIOL 5401 Advanced Ecology (3 credits)
Attain in-depth understanding of the ecology of the natural world beyond the scope of introductory-level general ecology. Learn about patterns and processes of ecological populations and communities, the mechanisms believed to be responsible for these processes, and the emergent properties of ecosystems. Focus on major theories in ecology and the empirical investigations that support or refute these theories. Read classic papers that introduced or popularized major theories in ecology, as well as more recent empirical tests of those theories.
Level of Study: Graduate
Last four terms offered: 2022 Fall Term, 2020 Fall Term, 2018 Fall Term, 2017 Fall Term
Schedule of Classes
Biol 5403 Tropical Ecology in Panama (3 credits)
Tropical Ecology is the study of the biotic and abiotic interactions that shape the origin, maintenance and consequences of species diversity in the tropics. The incredibly high species diversity found in tropical forests has intrigued biologists for centuries, including such luminaries as Darwin and Wallace and continues to be engaged by biologists today. Explores a variety of different forest types within the Republic of Panama to gain an appreciation for the basic patterns and processes of tropical forests and the mechanisms believed to be responsible for them. Modeled after the Organization for Tropical Biology’s Tropical Ecology Field Course.

Level of Study: Graduate

Last four terms offered: 2024 Spring Term, 2023 Spring Term, 2021 Spring Term, 2020 Spring Term

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%205403)

Biol 5404 Molecular Evolution (3 credits)
Covers introductory topics in molecular evolution based on readings from the literature. Topics include online sequence databases, sequence alignment, detecting natural selection, building phylogenetic trees, testing alternative phylogenetic hypotheses, molecular clocks, reconstructing ancestral sequences and gene duplication and loss. Students learn to use several software packages to perform these analyses.

Level of Study: Graduate

Last four terms offered: 2021 Fall Term

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%205404)

Biol 5410 Conservation Biology (3 credits)
The goals of conservation biology are to understand the causes and consequences of biodiversity loss – from genes to populations to species to ecosystems – and to develop tools and techniques to conserve biodiversity. Reviews what is known about the causes and consequences of current biodiversity loss, established and emerging strategies and tools to conserve biodiversity, and the ecological and evolutionary theory underlying these strategies. Includes population-modeling approaches such as population viability analysis, life-history tables, and sustainable harvest models, and conservation techniques such as species recovery plans, reserve design, habitat suitability models, seed banks, and restoration ecology. Focuses on the implications of biodiversity for ecosystem function and services, as well as the implications of conservation for policy, economics, and society. Builds essential skills for a career in biology, natural-resource management or conservation, including critical review of evidence and scientific literature, quantitative and conceptual modeling and practical decision making.

Level of Study: Graduate

Last four terms offered: 2023 Fall Term, 2021 Fall Term, 2019 Fall Term

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%205410)

Biol 5501 Cellular Neurobiology (3 credits)
General principles of the organization and function of the vertebrate nervous system. Topics include the cellular and molecular mechanisms of cell excitability, synaptic transmission, and how neuromodulators regulate these functions in neuronal networks; mechanisms of learning and memory at the synaptic level; sensory systems from transduction to higher-order processing; and motor systems from the neuromuscular junction to voluntary movement to provide an integrative understanding of the nervous system. A functional approach to neuroanatomy are integrated throughout the course.

3 hrs. lec., disc.

Level of Study: Graduate

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%205501)

Biol 5532 Biochemistry 2: Bioenergetics and Metabolism (3 credits)
An exploration of the thermodynamic, cellular and molecular features contributing to the organization and regulation of major metabolic pathways in plants and animals. Major topics focus on the thermodynamic and mechanistic principles governing pathways associated with carbohydrate, nucleic acid, lipid and amino acid metabolism. The integration, regulation and origins of these metabolic systems are explored in the context of biotechnology and disease.

Level of Study: Graduate

Last four terms offered: 2024 Spring Term, 2023 Spring Term, 2022 Spring Term, 2021 Spring Term

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%205532)

Biol 5703 Exercise Physiology (3 credits)
Study of the effects of acute and chronic exercise on selected organ systems. Particular emphasis is placed on muscle, cardiovascular, respiratory and environmental physiology.

Level of Study: Graduate

Last four terms offered: 2015 Spring Term, 2012 Spring Term, 2010 Spring Term

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%205703)

Biol 5806 Immunobiology (3 credits)
Cellular and molecular mechanisms of the immune response. Nature of antigens and antibodies and their interactions. Special topics include complement, immediate and delayed hypersensitivity, transplantation and tumor immunobiology, immunosuppression, and immunological tolerance.

3 hrs. lec., disc.

Level of Study: Graduate

Last four terms offered: 2024 Spring Term, 2023 Spring Term, 2022 Spring Term, 2021 Spring Term

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%205806)
**BIOL 6001 Radioisotope Safety (2 credits)**

Ionizing radiation: proper safety procedures in the independent use of radioisotopes and current regulatory guidelines and licensing procedures.

*Prerequisite:* BIOL 1002 and CHEM 1002; or BIOL 1009 and CHEM 1002; or cons. of dept. ch.

*Level of Study:* Graduate

*Last four terms offered:* 2010 Summer Term, 2008 Summer Term, 2007 Summer Term, 2004 Summer Term

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%206001](https://bulletin.marquette.edu/class-search/?details&code=BIOL%206001))

**BIOL 6096 Laboratory Rotations in Biology (1-3 credits)**

Informal lab rotation of first-year graduate students based on mutual preferences of the student and faculty member including lab group meetings, literature research, bench work, presentation of findings and/or research plan to lab members. S/U grade assessment.

*Prerequisite:* Cons. of dept. ch.

*Level of Study:* Graduate

*Last four terms offered:* 2024 Summer Term, 2024 Spring Term, 2023 Fall Term, 2023 Spring Term

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%206096](https://bulletin.marquette.edu/class-search/?details&code=BIOL%206096))

**BIOL 6097 Laboratory Research in Biology (1-3 credits)**

Independent research of second year graduate students based on their dissertation/thesis research laboratories, including lab group meetings, literature research, bench work and presentation of findings. S/U grade assessment.

*Prerequisite:* BIOL 6096 and cons. of dept. ch.

*Level of Study:* Graduate

*Last four terms offered:* 2024 Spring Term, 2023 Fall Term, 2023 Spring Term, 2022 Fall Term

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%206097](https://bulletin.marquette.edu/class-search/?details&code=BIOL%206097))

**BIOL 6952 Department Colloquium (0 credits)**

Scholarly reports on selected topics in modern biology by visiting and resident investigators and graduate students. Registration and attendance required of all full-time graduate students in biology. SNC/UNC grade assessment.

*Level of Study:* Graduate

*Last four terms offered:* 2024 Spring Term, 2023 Fall Term, 2023 Spring Term, 2022 Fall Term

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%206952](https://bulletin.marquette.edu/class-search/?details&code=BIOL%206952))

**BIOL 6995 Independent Study in Biological Sciences (1-3 credits)**

Faculty-supervised, independent study/research of a specific area or topic in biology.

*Prerequisite:* Cons. of instr. and cons. of dept. ch.

*Level of Study:* Graduate

*Last four terms offered:* 2014 Summer Term

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%206995](https://bulletin.marquette.edu/class-search/?details&code=BIOL%206995))

**BIOL 6999 Master's Thesis (1-6 credits)**

S/U grade assessment.

*Prerequisite:* Cons. of dept. ch.

*Level of Study:* Graduate

*Last four terms offered:* 2021 Spring Term, 2020 Fall Term, 2019 Spring Term, 2016 Fall Term

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%206999](https://bulletin.marquette.edu/class-search/?details&code=BIOL%206999))

**BIOL 8004 Advanced Experimental Design (2 credits)**

Designed to teach the central components of the scientific method with an emphasis on hypothesis development, experimental design, data analysis and data presentation.

*Prerequisite:* Cons. of dept.

*Level of Study:* Graduate

*Last four terms offered:* 2023 Fall Term, 2022 Fall Term

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%208004](https://bulletin.marquette.edu/class-search/?details&code=BIOL%208004))

**BIOL 8005 Scientific Writing (2 credits)**

Designed to teach basics of clear and effective scientific writing with emphasis on preparing and evaluating research manuscripts and proposals. Students learn editing techniques through deconstructing and revising others' work.

*Prerequisite:* Cons. of dept.

*Level of Study:* Graduate

*Last four terms offered:* 2023 Spring Term, 2022 Spring Term, 2021 Fall Term, 2020 Fall Term

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%208005](https://bulletin.marquette.edu/class-search/?details&code=BIOL%208005))

**BIOL 8007 Biometry (2 credits)**

Focuses on formalizing experimental design into a quantitative framework. Presented in a modern computational approach, emphasis is placed on model fitting, effect size estimation, and uncertainty, rather than strictly assessing 'significance' by means of p-values.

*Prerequisite:* BIOL 8004 or cons of instr.

*Level of Study:* Graduate

*Schedule of Classes* ([https://bulletin.marquette.edu/class-search/?details&code=BIOL%208007](https://bulletin.marquette.edu/class-search/?details&code=BIOL%208007))
BIOL 8101  Protein Structure and Function  (2 credits)
Advanced protein biochemistry stressing methodology and primary literature. Topics include: structural and chemical properties of amino acids, peptides and proteins; protein folding and assembly; protein-protein and protein-ligand interactions; enzyme kinetics and regulation; and the determination of protein structure. Uses examples from glycolytic and gluconeogenic metabolic pathways to highlight the structural basis for catalysis and regulation.; or cons. of instr.
Prerequisite: BIOL 3101 or equiv.
Level of Study: Graduate
Last four terms offered: 2017 Fall Term, 2014 Spring Term, 2012 Spring Term, 2009 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208101)

BIOL 8102  Biochemistry and Function of Nucleic Acids  (2 credits)
The biochemistry of RNA and DNA with emphasis on biological function and evolution. Specific topics include: nucleic acid structure, biophysical properties, biosynthesis, and molecular function.
Prerequisite: BIOL 3101 or cons. of instr.
Level of Study: Graduate
Last four terms offered: 2013 Spring Term, 2010 Fall Term, 2006 Fall Term, 1998 Summer Session 1
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208102)

BIOL 8110  Proteostasis  (2 credits)
Designed to follow proteins from birth at the ribosome, through life as a functional component of the cell, and into degradation at the end of the life-cycle., or cons. of instr.
Prerequisite: BIOL 3101 or equiv.
Level of Study: Graduate
Last four terms offered: 2023 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208110)

BIOL 8201  Epigenetics  (2 credits)
Focuses on the molecular biology of epigenetic gene expression states of eukaryotic model organisms and introduces molecular and genetic approaches to the analysis of epigenetic problems. In particular, the course addresses DNA methylation, RNA interference, chromatin structure, transposable elements and gene silencing.
Prerequisite: BIOL 3201 or equiv. and BIOL 3301 or equiv. or cons. of instr.
Level of Study: Graduate
Last four terms offered: 2023 Fall Term, 2020 Spring Term, 2017 Spring Term, 2009 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208201)

BIOL 8202  Principles of Eukaryotic Genetics  (2 credits)
Genetics of eukaryotic model organisms with a focus on genetic approaches to the analysis of contemporary biological problems. Eukaryotic chromosome structure and function.
Prerequisite: BIOL 3201 or equiv.
Level of Study: Graduate
Last four terms offered: 2013 Fall Term, 2011 Fall Term, 2010 Fall Term, 2008 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208202)

BIOL 8301  Imaging and Cytoskeletons  (2 credits)
Discusses the principles of cytoskeleton and molecular motors and modern imaging tools developed for the studies of cellular mechanisms.
Prerequisite: BIOL 2301 or equiv.
Level of Study: Graduate
Last four terms offered: 2018 Fall Term, 2013 Fall Term, 2011 Fall Term, 2011 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208301)

BIOL 8302  Protein Trafficking and Organelle Identity in Eukaryotic Cells  (2 credits)
An in-depth analysis of protein trafficking and organelle identity in eukaryotic cells. Discusses, in detail, mechanisms of protein translocation across biological membranes and the genetic and biochemical analysis of protein sorting to diverse organelles.
Prerequisite: BIOL 3301 or equiv.
Level of Study: Graduate
Last four terms offered: 2020 Fall Term, 2019 Spring Term, 2012 Fall Term, 2010 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208302)

BIOL 8603  Cell and Molecular Biology of Early Development  (2 credits)
Study of the cellular and molecular mechanisms underlying the specification of cell fate in a variety of model organisms including fruit flies, nematodes, mice and zebra fish. Emphasizes genetic, biochemical and molecular techniques used in studying these complex systems.; or BIOL 4601 or equiv.
Prerequisite: BIOL 3301 or equiv.
Level of Study: Graduate
Last four terms offered: 2022 Fall Term, 2020 Fall Term, 2018 Fall Term, 2016 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208603)
BIOL 8701 Advanced Physiology and Organ Systems (2 credits)
Focuses on organ systems and how organs contribute to the overall physiology of organisms. Topics include homeostatic control and disease states.
Prerequisite: BIOL 4701 or equiv.
Level of Study: Graduate
Last four terms offered: 2023 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208701)

BIOL 8704 Cellular Homeostasis (2 credits)
Detailed study of the proteins and pathways involved in the maintenance of cell volume, pH, and ionic balance, including the analysis of the function of plasma membrane transporter and channel proteins. The emphasis will be on eukaryotic cells, but prokaryotic cells will also be covered., or cons. of instr.
Prerequisite: BIOL 2301 or equiv.
Level of Study: Graduate
Last four terms offered: 2018 Spring Term, 2016 Spring Term, 2014 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208704)

BIOL 8801 Prokaryotic Molecular Genetics (2 credits)
Basic principles of bacterial genetics and regulation of gene expression. Points of emphasis: 1) how genetics and regulation shape and are shaped by the biology of the organism, 2) principles that are important to all biologists, including the manipulation of bacteria in genetic cloning and protein production, 3) application of genetics to elucidate cell physiology and biochemistry.
Prerequisite: BIOL 3101 or BIOL 4801 or BIOL 8102 or an equiv. of any of these; or cons. of instr.
Level of Study: Graduate
Last four terms offered: 2012 Fall Term, 2010 Fall Term, 2008 Fall Term, 2006 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208801)

BIOL 8802 Microbiomes in Health and the Environment (2 credits)
Exploration of the ways bacteria, archaea and viruses influence all ecosystems on the planet, from extreme environments to human bodies.
Level of Study: Graduate
Last four terms offered: 2021 Spring Term, 2018 Spring Term, 2015 Fall Term, 2013 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208802)

BIOL 8803 Microbial Diversity and Ecology (2-3 credits)
Study of microbial phylogenetic and physiological diversity underlying the ecological interactions in natural communities. Emphasizes quantitative molecular techniques and sequencing used in studying microbial communities in the environment. Develops critical thinking and writing skills in determining research objectives and testing hypotheses.
Level of Study: Graduate
Last four terms offered: 2017 Spring Term, 2015 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208803)

BIOL 8931 Topics in Biology (1-3 credits)
Subject matter variable as determined by needs of biological sciences graduate students. Students may enroll more than once as subject matter changes.
Prerequisite: Cons. of dept. ch.
Level of Study: Graduate
Last four terms offered: 2022 Spring Term, 2021 Fall Term, 2021 Spring Term, 2020 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208931)

BIOL 8953 Seminar in Biochemistry and Genetics (1 credits)
Topics of current interest in biochemistry and genetics.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2024 Spring Term, 2022 Fall Term, 2022 Spring Term, 2021 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208953)

BIOL 8954 Seminar in Plant Molecular Biology (1 credits)
Topics of current interest in plant molecular biology.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2019 Fall Term, 2010 Fall Term, 2008 Fall Term, 2006 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208954)
BIOL 8955 Seminar in Neuroscience (1 credits)
Topics of current interest in neuroscience.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2018 Fall Term, 2018 Spring Term, 2017 Fall Term, 2017 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208955)

BIOL 8956 Seminar in Cell and Developmental Biology (1 credits)
Topics of current interest in cell and developmental biology.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2023 Fall Term, 2023 Spring Term, 2022 Spring Term, 2020 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208956)

BIOL 8957 Seminar in Physiology (1 credits)
Topics of current interest in physiology.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2024 Spring Term, 2021 Fall Term, 2019 Fall Term, 2015 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208957)

BIOL 8958 Seminar in Ecology and Evolutionary Biology (1 credits)
Topics of current interest in ecology and evolutionary biology.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2023 Fall Term, 2022 Fall Term, 2021 Fall Term, 2021 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208958)

BIOL 8959 Seminar in Microbiology (1 credits)
Topics of current interest in microbiology.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2023 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=BIOL%208959)

BIOL 8995 Independent Study in Biological Sciences (1-3 credits)
Faculty-supervised, independent study/research of a specific area or topic in biology.
Prerequisite: Cons. of instr. and cons. of dept. ch.
Level of Study: Graduate
