Degree Offered

Master of Science

Program Description

The master of science in clinical mental health counseling is dedicated to training professional counselors in evidence-based and emerging best practices and prepares students to practice as a professional counselor. Course work focuses on human development, psychopathology, assessment, theories of counseling, consultation, ethical and legal issues, multicultural issues and counseling research, as well as individual, group, family and counseling interventions. Field experiences, small group experiences and practicum and internship are required and lead to the development of science-practice integration in all our graduates.

Clinical Mental Health Counseling Master of Science

Specializations: Addiction Counseling, Child and Adolescent Counseling, Clinical Rehabilitation Counseling

The Department of Counselor Education and Counseling Psychology offers in-person as well as online options. Students may choose one of four in-person, on-campus options by enrolling in the non-specialization option or one of three specializations: addiction counseling, child and adolescent counseling or clinical rehabilitation counseling. As an alternative, students may choose one of the two fully-online options: the non-specialization option or the child and adolescent counseling specialization.

Program Requirements

The master of science degree program in clinical mental health counseling requires 60 credit hours and successful completion of a comprehensive examination.

For the non-specialization option, the following courses are required. All courses are the same for both in-person and online options.
