Exercise and Rehabilitation Science, PHD

Program Director: Marie Hoeger Bement M.P.T., Ph.D.
Exercise and Rehabilitation Science website (https://www.marquette.edu/physical-therapy/exercise-rehabilitation-science.php)

Degree Offered
Doctor of Philosophy

Department of Physical Therapy Mission
To prepare future health care practitioners and researchers with an education rich in clinical experiences, community outreach, and research opportunities to develop leaders guided by the values of “Cura Personalis.”

Learning Outcomes
The exercise and rehabilitation science (EXRS) doctoral program is built on the knowledge and skills of a licensed post-baccalaureate trained clinician or master’s student in a related field and provides students with advanced knowledge and skills related to clinical and translational research in fields including pathokinesiology, neuroscience, motor and respiratory control, exercise physiology, medical decision making, skeletal muscle physiology and sports medicine.

Graduates of the Doctoral Degree in Exercise and Rehabilitation Science Will be Able to:
1. Deliver an effective oral presentation of the dissertation proposal.
2. Demonstrate a comprehensive understanding of pertinent literature.
3. Identify research questions or problems that are pertinent and significant.
4. Gather, organize, analyze and report data using an appropriate conceptual framework.
5. Adhere to requirements for protection of human subjects.
6. Interpret results in a way that relates to the research findings and adds to understanding in the field.
7. Demonstrate commitment to advancing the values of scholarship in their own careers and in the mentorship of others.

Program Description
The doctor of philosophy in exercise and rehabilitation science (https://www.marquette.edu/grad/programs-exercise-rehabilitation-science-graduate-program.php) builds upon the core competencies of clinical degrees (anatomy, physiology, pharmacology, medical ethics and patient care) with course work in rehabilitation systems physiology, applied neurophysiology, statistics, molecular genetics and research methodology. Students gain extensive research experience in the exercise, rehabilitation and movement disorders research core laboratories housed within the exercise science program and the Department of Physical Therapy. Research includes the use of EMG, transcranial magnetic stimulation, motion analysis, biomechanics, isokinetic dynamometry, fMRI, body composition, bone mineral density, diagnostic ultrasound and acute and chronic exercise training to explore mechanisms of dysfunction and develop theories for restoring function in people with movement disorders. Movement disorders cross age, gender and all ethnic boundaries and include populations with multiple sclerosis, post-traumatic stress disorder, traumatic brain injury, stroke, cancer, Type II diabetes, survivors, pediatric obesity, cardiovascular diseases and chronic pain syndromes.

The Clinical and Translational Science Institute of Southeastern Wisconsin is a major partner with Marquette’s exercise and rehabilitation science program. Marquette’s participation in this consortium expands opportunities for academic, medical and clinical research within Milwaukee. CTSI partner institutions include the Medical College of Wisconsin, University of Wisconsin-Milwaukee, the Milwaukee School of Engineering, the Zablocki V.A. Medical Center, Children’s Hospital of Wisconsin and Versiti Blood Center of Wisconsin.

General Information
Students applying to the doctoral program must have successfully completed either a master’s degree in a related discipline or a post-baccalaureate clinical degree (D.P.T., M.P.T., M.P.A., M.S.N., M.D., etc.) with a minimum cumulative GPA of 3.000 (based on a 4.000 scale). Applicants to the master's program must have an undergraduate degree in a related field with a minimum cumulative GPA of 3.000 (based on a 4.000 scale).

The GRE (if applicable) must have been completed within the previous six years, and official scores must be sent to Marquette University directly from Educational Testing Service.

Academic Standards
A cumulative GPA of 3.000 is required in the exercise and rehabilitation science program. The Policies (https://bulletin.marquette.edu/policies/) tab describes the criteria and procedures for academic warnings, probation, removal of probation and dismissal. The exercise and rehabilitation science program strictly follows these policies and procedures.
Exercise and Rehabilitation Science Doctorate

The program of course work and research for the doctoral degree in exercise and rehabilitation science is determined in consultation with the student’s advisory committee. Each student is advised to take such courses that are properly related to academic background and research interests. A doctoral student must complete a program of study defined, in conjunction with an adviser, on an approved Doctoral Program Planning Form.

A maximum of 24 credit hours from a previously earned master’s degree may be counted toward the required post-baccalaureate total of 70 credit hours required for the doctoral degree, resulting in 46 post-master’s credit hours. The credit hours required at the post-master’s level could be higher, depending on the specific course work taken at the master’s level.

Credits from graduate course work transferred in are selected from basic science foundational topics (i.e., advanced anatomy, physiology, microbiology, genetics and pharmacology). Selected courses are documented on the Doctoral Program Planning Form which must be submitted to the Graduate School by the end of the first year.

In addition to the course work completed prior to enrollment in the doctoral program, students may choose to complete graduate course work at a partnering Clinical and Translational Science Institute (CTSI) during their time of study. Once the mentor has been selected, advanced graduate electives may be chosen from any of the CTSI partner institutions (MSOE, MCW, UWM). See the Departmental Graduate Student Handbook for specific requirements. Advancement to candidacy for the doctoral degree is considered following successful completion of all requirements specified on the Doctoral Program Planning Form and after passing a doctoral qualifying examination.

Required Post-Master’s Course Work

A typical doctoral student must complete 27 credit hours of core course work, 7 credit hours of advanced electives (minimum of 2 courses, with no more than 6 credit hours coming from a seminar or research methods course). All students are required to attend the departmental seminar series which expands the student’s knowledge in research theory, statistical analysis, basic biomechanics, kinesiology principles and ethical decision-making, as well as exposure to research opportunities within the program. In addition, doctoral candidates complete 12 credit hours of dissertation work for a combined total (including master’s transfer credits) of 70 credit hours. The student must submit and defend a dissertation after completing all other formal requirements for the doctoral degree.

Exercise and Rehabilitation Science Graduate Programs

• Exercise and Rehabilitation Science, MS (https://bulletin.marquette.edu/graduate/exercise-rehabilitation-science-ms/)
• Exercise and Rehabilitation Science, PHD (p. 1)

EXRS 6001 Applied and Rehabilitative Systems Physiology (3 credits)
An advanced and in-depth presentation of the impact of disease and rehabilitation on the major and physiologic systems. Systems may include skeletal muscle, cardiovascular, pulmonary, endocrine, immune and intermediary metabolism. Addresses clinical and translational models from a systems and disease perspective. Examples may include aging, fatigue, immobilization, cancer, multiple sclerosis, mitochondrial and metabolic disorders, chronic stress and pain.
Prerequisite: BISC 5135 and BISC 5145.
Level of Study: Graduate
Last four terms offered: 2022 Fall Term, 2021 Fall Term, 2020 Fall Term, 2019 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206001)

EXRS 6020 Measurements, Tests, and Techniques in Rehabilitation Science (3 credits)
An overview of the tests, measurements and evaluation used in exercise and rehabilitation science research. Advanced discussion of validity and reliability of measurements tools and devices. Topics include physiological and psychosocial testing.
Prerequisite: Admitted to the graduate EXRS or NURS program; graduate course in statistics.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206020)

EXRS 6030 Advanced Principles and Instrumentation in Biomechanics (3 credits)
Presents biomechanical concepts important to the study of human movement and activity and explores the instrumentation used in this study. Discusses and applies biomechanical principles including Newton’s laws, anthropometrics, statistics, dynamics, material properties, kinetics and kinematics. Instrumentation such as electromyography, accelerometers, force transducers, optical sensor and force plates are discussed and utilized in the study of human movement. Discusses the design, implementation and calibration of these instruments.
Prerequisite: EXRS 6001 which may be taken concurrently.
Level of Study: Graduate
Last four terms offered: 2021 Fall Term, 2019 Fall Term, 2017 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206030)

EXRS 6130 Neuromechanical Control and Regulation of Coordinated Movement (2 credits)
In-depth study of the neural, mechanical and muscular determinants that affect the control and regulation of coordinated movement in healthy and pathological populations.
Prerequisite: EXRS 6030.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206130)

EXRS 6201 Neurophysiological Principles in Disease and Rehabilitation (3 credits)
Examines system level neurophysiological principles in disease and rehabilitation.
Prerequisite: BISC 5135 and EXRS 6001.
Level of Study: Graduate
Last four terms offered: 2022 Spring Term, 2020 Spring Term, 2018 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206201)

EXRS 6250 Neural Control of Locomotion (3 credits)
In-depth study of the neural mechanisms underlying locomotor movements, with emphasis on human locomotion.
Prerequisite: EXRS 6201.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206250)

EXRS 6290 Brain Dissection (1 credits)
An in-depth approach to the anatomy of the human brain. Emphasizes correlations between structure and function.
Prerequisite: Admitted to the graduate EXRS program.
Level of Study: Graduate
Last four terms offered: 2023 Summer Term, 2022 Summer Term, 2021 Summer Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206290)
EXRS 6320 Molecular and Biochemical Techniques in Rehabilitation Health Science (2 credits)
Covers medical and forensic molecular biology, including a review of DNA/RNA structure and function, and biochemical analysis. Relevant laboratory techniques include isolation of genomic DNA from various tissue samples, PCR, RFLP, molecular diagnosis of cancer, detection of infectious agents and identification of inherited diseases. Discusses proper sample processing, handling and storage. Special topics related to specific clinical populations based upon student interests discussed and techniques reviewed.
Level of Study: Graduate
Last four terms offered: 2022 Fall Term, 2020 Fall Term, 2018 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206320)

EXRS 6380 Contemporary Pain Rehabilitation (2 credits)
Concepts relating to understanding the basic mechanisms of pain transmission, modulation, including how these influence clinical decision making.
Prerequisite: PHTH 7530, which may be taken concurrently.
Level of Study: Graduate
Last four terms offered: 2022 Spring Term, 2020 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206380)

EXRS 6505 Aging and Physical Activity (2 credits)
Explores the aging process using a multi-focal approach. Examines mental, physical and social facets of aging and develops the skills to program fitness and wellness activities for older adults of variable levels of health. Allows hands-on experience in leading and programming exercise with older adults while offering an opportunity to provide a valuable community service in the Milwaukee area.
Prerequisite: EXRS 6001.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206505)

EXRS 6510 Obesity - A Comprehensive Approach (2 credits)
Explores obesity as a disease process using a multi-focal approach. Examines mental, physical and social facets of obesity, as well as, approaches to treatment and prevention. For EXPH/ATTR students, application of classroom material occurs via service learning at a variety of sites in MPS and other area facilities.
Prerequisite: EXRS 6001.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206510)

EXRS 6515 Neuromuscular Plasticity in Health and Disease (3 credits)
Examines system level neurophysiological adaptations to activity, disease and rehabilitation with emphasis on sensory and motor systems.
Prerequisite: EXRS 6001 and EXRS 6201.
Level of Study: Graduate
Last four terms offered: 2023 Spring Term, 2021 Spring Term, 2019 Spring Term, 2015 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206515)

EXRS 6520 Physiological Adaptations to Environmental Stress (2 credits)
Systems based physiological responses and adaptations to acute and chronic environmental stress. Considerations given to rest and exercise conditions. Topics may include spaceflight and microgravity, hyperbaric environments, hypoxia, high altitude, heat and cold.
Prerequisite: EXRS 6001; BISC 5135; and EXPH 4192 or EXPH 5192.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206520)

EXRS 6530 Spinal Mechanisms of Motor Control and Implications of Rehabilitation (2 credits)
Primarily journal-based discussion with exposure to various motor control laboratories in the Midwest.
Prerequisite: EXRS 6001 and EXRS 6201.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206530)

EXRS 6540 Fatigue in Health and Disease (3 credits)
An advanced and in depth presentation of the neuromuscular fatigue in healthy, diseased and disabled populations. Explores neural and muscular mechanisms of neuromuscular fatigue for different task conditions and populations that may include: aging, gender, cognitive demand, environmental temperature, practice and neural and muscular disorders, such as, multiple sclerosis, cancer, chronic and acute stress conditions, Alzheimer's disease and stroke.; or cons. of instr.
Prerequisite: EXRS 6001 or equiv.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206540)
**EXRS 6550  Physiology of Aging  (3 credits)**
Provides an understanding of the physiology of normal aging and how that differs at times to the pathophysiology of human disease. Presents the normal aging process and disease processes to determine between normal and pathologic presentation, in order to design and implement appropriate therapeutics. Describes modifications in practical areas that will enhance care of the geriatric patient. Topics may include cardiovascular, respiratory, neural systems, cognition, renal, endocrine, immunology, bone and special senses. Each class session ends in a discussion of the clinical implications as they relate to common practice or professions of choice.
*Prerequisite: EXRS 6001.*
*Level of Study: Graduate*

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206550)

**EXRS 6560  Systematic Reviews and Meta-analysis  (2 credits)**
Examines the steps for conducting systematic reviews and introduction to meta-analysis. Emphasis is on practical application of the steps involved in conducting systematic reviews.
*Prerequisite: Admitted to the graduate EXRS program.*
*Level of Study: Graduate*

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206560)

**EXRS 6570  Neuromodulation Techniques and Applications in Rehabilitation Science  (3 credits)**
Discusses the theoretical and practical aspects of neuromodulation as a means to understand and treat disorders of the nervous system and their specific application in neurorehabilitation. Includes demonstrations and laboratory experiences.
*Prerequisite: Admitted to the graduate EXRS program and concurrent enrollment in EXRS 6201.*
*Level of Study: Graduate*

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206570)

**EXRS 6590  Performance and Rehabilitation  (2 credits)**
Focuses on providing an advanced level understanding of the physiology of performance enhancement as it relates to rehabilitation. Topics include advanced training procedures, assessment techniques and elite training theories. Discusses common surgical procedures and rehabilitation techniques associated with elite athletes with opportunities for observation as permitted. Addresses various subsets of the population, when appropriate, regarding specificity of responses to speed, agility and power training (elite, college, women and sport specific programs). Understanding is demonstrated by incorporation of and application of background knowledge obtained in other courses (exercise physiology, strength and conditioning, biomechanics, kinesiology and orthopedic physical therapy) into the development of exercise programs for specific populations with the purpose of performance enhancement. Includes consideration of the rehabilitation of elite athletic populations experiencing conditions commonly requiring physical therapy intervention (upper or lower extremity or core injuries).
*Prerequisite: EXRS 6001.*
*Level of Study: Graduate*

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206590)

**EXRS 6600  Project Design and Development in Exercise and Rehabilitation Science  (3 credits)**
Provides mentorship in the design and development of the non-thesis master's project to include selecting the topic, population, community or site for project, design of methods and developing the agreements or contracts for the project. 0 credit will be SNC/UNC grade assessment; 1-3 credits will be S/U grade assessment.
*Prerequisite: Admitted to the graduate EXRS program.*
*Level of Study: Graduate*

Last four terms offered: 2023 Summer Term, 2023 Spring Term, 2022 Summer Term

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206600)

**EXRS 6650  Research Methods in Exercise and Rehabilitation Science  (1-6 credits)**
Introduction to and mastery of specific research techniques and methods associated with the research expertise of faculty in clinical and translational rehabilitation health.
*Prerequisite: Admitted to the graduate EXRS program.*
*Level of Study: Graduate*

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206650)

**EXRS 6931  Topics in Exercise and Rehabilitation Science  (1-3 credits)**
Topics of current interest to exercise and rehabilitation science.
*Prerequisite: Admitted to the EXRS M.S. or Ph.D. program; or cons. of instr.*
*Level of Study: Graduate*

Last four terms offered: 2022 Spring Term, 2021 Spring Term, 2020 Fall Term

Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206931)
EXRS 6953  Journal Club in Exercise and Rehabilitation Science  (3 credits)
Scholarly presentations by visiting faculty and clinicians, resident faculty and graduate and undergraduate students on current topics related to clinical and translational health. 0 credit will be SNC/UNC grade assessment; 1-3 credits will be S/U grade assessment.
Prerequisite: Admitted to the graduate EXRS program.
Level of Study: Graduate
Last four terms offered: 2023 Summer Term, 2022 Summer Term, 2021 Summer Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206953)

EXRS 6957  Inquiry and Scientific Method 1  (1 credits)
Seminar style course with a discussion section for research graduate students on the principles and methods related to interpreting and presenting research.
Prerequisite: Admitted to the graduate EXRS program.
Level of Study: Graduate
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206957)

EXRS 6958  Readings and Research 1  (3 credits)
Introduces readings and ongoing research in individual laboratories of faculty within the CTSI. The number of hours varies, but the rotation typically consists of two-three rotations. Involves laboratory work, attending laboratory meetings, individual meetings with laboratory PI and oral presentation of progress made in this rotation. Directs students toward potential laboratories with interest or expertise as identified by the student in areas related to exercise and rehabilitation health. Presents various techniques and methods in individual laboratories. Students select their research mentor and collaborators for their project by the end of the course. 0 credit will be SNC/UNC grade assessment; 1-3 credits will be S/U grade assessment.
Prerequisite: Admitted to the graduate EXRS program.
Level of Study: Graduate
Last four terms offered: 2022 Fall Term, 2021 Fall Term, 2020 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206958)

EXRS 6959  Readings and Research 2  (3 credits)
Introduces readings and ongoing research in individual laboratories of faculty within the CTSI. The number of hours varies, but the rotation typically consists of two-three-two rotations. Involves laboratory work, attending laboratory meetings, individual meetings with laboratory PI and oral presentation of progress made in this rotation. Directs students toward potential laboratories with interest or expertise as identified by the student in areas related to exercise clinical and translational rehabilitation health. Presents various techniques and methods in individual laboratories. Students select their research mentor and collaborators for their project by the end of the course. 0 credits will be SNC/UNC grade assessment; 1-3 credits will be S/U grade assessment.
Prerequisite: Admitted to the graduate EXRS program.
Level of Study: Graduate
Last four terms offered: 2023 Spring Term, 2022 Spring Term, 2021 Spring Term, 2020 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206959)

EXRS 6960  Inquiry and Scientific Method 2  (1 credits)
Advanced seminar and discussion course allowing research graduate students to take leadership roles in relation to interpreting and presenting research.
Prerequisite: Admitted to the graduate EXRS program.
Level of Study: Graduate
Last four terms offered: 2023 Spring Term, 2022 Spring Term, 2021 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206960)

EXRS 6995  Independent Study in Exercise and Rehabilitation Science  (1-3 credits)
Faculty-supervised, independent study/research of a specific area or topic in Exercise and Rehabilitation Science.
Prerequisite: Cons. of instr. and cons. of prog. dir.
Level of Study: Graduate
Last four terms offered: 2023 Spring Term, 2022 Spring Term, 2021 Fall Term, 2021 Summer Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206995)

EXRS 6998  Professional Project in Exercise and Rehabilitation Science  (3 credits)
0 credit will be SNC/UNC grade assessment; 1-3 credits will be S/U grade assessment.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2023 Spring Term, 2022 Spring Term, 2021 Spring Term, 2020 Spring Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206998)

EXRS 6999  Master's Thesis  (1-6 credits)
S/U grade assessment.
Prerequisite: Cons. of instr.
Level of Study: Graduate
Last four terms offered: 2022 Spring Term, 2020 Fall Term
Schedule of Classes (https://bulletin.marquette.edu/class-search/?details&code=EXRS%206999)
**EXRS 8995 Independent Study in Exercise and Rehabilitation Science (1-3 credits)**

In-depth research on a topic or subject matter usually not offered in the established curriculum with faculty and independent of the classroom setting.

*Prerequisite:* Cons. of instr. and cons. of prog. dir.

*Level of Study:* Graduate

*Last four terms offered:* 2023 Spring Term, 2021 Fall Term, 2020 Fall Term, 2019 Fall Term

Schedule of Classes ([link](https://bulletin.marquette.edu/class-search/?details&code=EXRS%208995))

**EXRS 8999 Doctoral Dissertation (1-12 credits)**

S/U grade assessment.

*Prerequisite:* Cons. of instr.

*Level of Study:* Graduate

*Last four terms offered:* 2023 Spring Term, 2022 Fall Term, 2022 Spring Term, 2021 Fall Term

Schedule of Classes ([link](https://bulletin.marquette.edu/class-search/?details&code=EXRS%208999))

**EXRS 9970 Graduate Standing Continuation: Less than Half-Time (0 credits)**

Fee. SNC/UNC grade assessment. Designated as less than half-time status only, cannot be used in conjunction with other courses, and does not qualify students for financial aid or loan deferment.

*Prerequisite:* Cons. of prog. dir.

*Level of Study:* Graduate

*Last four terms offered:* 2021 Spring Term, 2020 Fall Term, 2020 Spring Term

Schedule of Classes ([link](https://bulletin.marquette.edu/class-search/?details&code=EXRS%209970))

**EXRS 9974 Graduate Assistant Teaching: Full-Time (0 credits)**

Fee. SNC/UNC grade assessment. Designated as full-time status. If a student is already registered in other courses full time, this continuation course is not needed.

*Prerequisite:* Cons. of prog. dir.

*Level of Study:* Graduate

Schedule of Classes ([link](https://bulletin.marquette.edu/class-search/?details&code=EXRS%209974))

**EXRS 9975 Graduate Assistant Research: Full-Time (0 credits)**

Fee. SNC/UNC grade assessment. Designated as full-time status. If a student is already registered in other courses full time, this continuation course is not needed.

*Prerequisite:* Cons. of prog. dir.

*Level of Study:* Graduate

*Last four terms offered:* 2023 Spring Term, 2022 Fall Term, 2022 Spring Term, 2021 Fall Term

Schedule of Classes ([link](https://bulletin.marquette.edu/class-search/?details&code=EXRS%209975))

**EXRS 9976 Graduate Assistant Research: Full-Time (0 credits)**

Fee. SNC/UNC grade assessment. Designated as full-time status. If a student is already registered in other courses full time, this continuation course is not needed.

*Prerequisite:* Cons. of prog. dir.

*Level of Study:* Graduate

*Last four terms offered:* 2023 Spring Term, 2022 Fall Term, 2022 Spring Term, 2021 Fall Term

Schedule of Classes ([link](https://bulletin.marquette.edu/class-search/?details&code=EXRS%209976))

**EXRS 9984 Master’s Comprehensive Examination Preparation: Less than Half-Time (0 credits)**

Fee. SNC/UNC grade assessment. Allows a student to be considered the equivalent of less than half-time status. Requires that the student is working less than 12 hours per week toward their master’s comprehensive exam.

*Prerequisite:* Cons. of graduate prog. dir.

*Level of Study:* Graduate

Schedule of Classes ([link](https://bulletin.marquette.edu/class-search/?details&code=EXRS%209984))
