The curriculum for the International Business (IB) major is designed to educate students with a relatively broad knowledge of international commercial enterprises. IB majors learn about international trade, financial, banking, monetary concepts and issues; import, export and international and regulatory practices; international accounting and taxation; global marketing; and/or management of global entities and human resources. Requiring a double major, students also obtain another major in a functional business field such as accounting, economics, innovation and entrepreneurship, finance, information systems, human resources management, marketing, real estate or supply chain management.

International Business

Students majoring in International Business must pair this major with an additional primary major in the college. A least two Functional courses are required, the additional two courses can be taken from either Functional or Experiential and Global Perspective courses. Only one non-business course from the course options may be chosen to use toward major requirements.

Note: The total number of business electives, including the International Business (INBU) major and the primary major, must be 30 credits. Courses may only count toward the INBU major if they do not count toward the requirements for another declared major or minor. Students seeking an INBU major course must meet all listed prerequisites in order to enroll.
